

To the Rules for the provision of freight forwarding services

List of Goods Subject to Mandatory Packaging in Protective Shipping Containers (PSC)

This list contains the categories of goods that are subject to mandatory packing in the PSC

In the absence or refusal of PSC, the Forwarder has the right not to accept this cargo for transportation.

Vehicles, Bicycles, Motorcycles

1. Transport Facilities

Boats (except for rubber ones packed in bags), cars, boats, snowmobiles, sledges and skis for snowmobiles, jet skis/hydro cycles, ATVs, motorcycles and trailers for them, mopeds, bicycles and other vehicles and mechanisms.

Equipment

2. Aggregates and various industrial equipment or mechanisms that do not have rigid packaging of proper quality:

- ❖ Equipment with pronounced elements, an upper surface limiting the possibility of stacking other goods on it, having a complex structural shape, the transportation of which may damage other goods (machines, conveyor equipment, ventilation equipment, etc.);
- ❖ Concrete mixers, compressors, woodcutters, lawn mowers, garden machines, electric cars (including for children), etc.;
- ❖ Terminals (payment, gaming, gas station terminals, etc.).

3. Sports equipment, exercise equipment and appliance, other sports equipment

4. Photochemical materials, photographic and cinematographic equipment, photographic and X-ray films of any kind

Furniture, building materials and interior items

5. Furniture:

- ❖ Any upholstered furniture (sofas, armchairs, poufs, etc.);
- ❖ Any furniture assembled or disassembled (cabinets, partitions, etc.);
- ❖ Any compact furniture (panels, stained-glass, facades, etc.);

- ❖ Any furniture containing glass and plastic parts (doors, stained-glass, partitions, etc.);
- ❖ Billiard tables and their elements;
- ❖ Mattresses.

6. Entrance and interior doors.

7. Fragile interior items:

- ❖ Chandeliers, vases, paintings, panoramas, mirrors, cornices, sculptures, showcases, stained glass, aquariums, etc.;
- ❖ Materials for compositions - floristry.

8. Building materials and decorative materials: Wallpaper, dry mixes, parquet, linoleum, floor coverings, stretch ceilings, decorative and facing panels for external and internal works, double-glazed windows, plasterboard sheets, chipboard, tiles.

9. Products and blanks made of soft, thin-walled metal (mailboxes, fire cabinets, electrical cabinets, storage shelves in stores, sheets, pipes, profiled sheets, profiles, etc.)

10. Steel structures:

- ❖ Long metal constructions (pipes, fittings, profiles), the length of which significantly exceeds the length of a standard Euro pallets (1.2 x 0.8 m) with an insignificant own width/height;
- ❖ Sheet metal constructions (nets, sheets, corrugated board) the length and width of which significantly exceed their own height/thickness.

Auto parts

11. Auto parts (new or used): body parts (elements) (doors, car bonnet, fenders, moldings, etc.), bumpers, engines, transmission, optics (headlights, glass for headlights, lights, etc.), rims without packaging, radiators, etc.

12. Accumulators batteries. The batteries are accepted for carriage only in an uncharged state if it is possible to verify this fact, or if there are appropriate accompanying documents.

Appliances

13. Technique:

- ❖ Built-in household appliances (refrigerators, washing machines, dishwashers, etc.);
- ❖ Plasma and liquid crystal panels, TVs, computers, laptops, tablets, office equipment.

Fragile

14. Cargoes containing glass, ceramic, porcelain, faience or other fragile, breakable elements:

- ❖ Dishes made of glass, ceramics, porcelain, faience, and other fragile materials;
- ❖ Plumbing (ceramics, faience, showers, solariums, sinks, laundries, bathrooms);
- ❖ Exhibition stands and other equipment for exhibitions that do not have rigid packaging of proper quality, incl. showcase and stands for shops.
- ❖ Musical instruments without rigid packaging (plastic covers, cases, etc.).

15. **Fragile wooden and plastic products:** booths, beehives, plastic toys, plastic for blinds, windows, window sills, coffins, various fragile hollow plastic products, etc.

16. **Loads of a large area from materials subject to deformation:**

- ❖ Satellite dishes;
- ❖ Animal cages, iron gates and individual panels.

17. Plastic sheets and products of any volume and purpose, including household goods made of plastic.

18. Stone products (monuments, crosses, plaques, other ritual items).

Liquids, containers, bags

19. **Any liquid in any package:**

- ❖ Canisters, barrels, buckets, plastic, glass and metal tins/jars, tanks (varnishes, enamels, undercoats, paints, drying oils, liquid resins, solvents, thinners);
- ❖ Cylinders with gas and liquid, gas holders, fire extinguishers;
- ❖ Other liquids.

The exception is spraying household chemicals in packaging less than 0.5 liters: air fresheners, deodorants, repellents, cleaning agents, polishes, etc. These goods are accepted for carriage without mandatory rigid packaging. Regardless of the type of container and packaging, flammable, poisonous, highly flammable, explosive and other liquids requiring special conditions of transportation and storage are not accepted for transportation.

20. **Cargo packed in a plastic or metal container (packaging) of any volume and / or type** that does not have rigid packaging, if such a container (packaging) is part of the goods, the damage of which may affect the value of the cargo (goods), and / or lead to the possibility

of access to the contents of the cargo, as well as when such a container (package) is exposed to leakage, spilling, etc. of its contents.

21. Bulk goods in paper and plastic bags (food additives, building mixtures, animal feed, chemicals, etc.)

Other

22. Books, magazines and other printed matter;

23. **Cargo initially handed over to the warehouse in a dirty condition**, with paint / oil stains (chains and metal cables, barrels with paint/oil stains, etc.).

24. Other goods, the transportation of which without additional packaging in the PSC may lead to their damage or damage to the goods transported with them or their packaging.

PSC (protective shipping container) is a wooden crate made of lumber, made around the perimeter of the cargo packaging, or alternative packaging - a pallet board (prefabricated pallet board or individual pallet board).

Regardless of whether the cargo is included in this list by its characteristics, the Client, upon delivery of the cargo, is obliged to hand over the cargo in packaging of proper quality, capable of ensuring the safety of the cargo during the transportation of prefabricated cargo.

Packaging of NOT good quality includes: paper packaging, polyethylene, stretch film, cardboard box that has lost its signs of integrity and rigidity.

Packaging of proper quality includes: integral cardboard boxes (not less than three-layer), which have not lost their geometric shape and rigidity, wooden and plywood boxes of proper strength.

If the Client delivers the cargo in packaging of NOT proper quality, it is necessary to carry out additional processing of the cargo using stretching, cardboard boxes, bubble wrap and other packaging materials, thereby bringing the packaging of the cargo in proper condition.

If the Client doesn't provide proper packaging and containers for the cargo, and has not entrusted its execution to the Forwarder, then the Forwarder has the right to:

a) Not to start fulfilling the obligations stipulated by the contract until the packaging and containers are in proper condition;

- b) To accept the cargo for Forwarders, to place it in the vehicle in such a way that it does not pose a threat to the cargo of other customers. In this case, the cost of carriage of goods is determined on the basis of the following three dimensions: 1) height - 2.2m (constant), 2) width - 2.4m (with a cargo width of more than 1.5m) or based on the minimum permissible value for safe transportation (with a cargo width less than 1.5m), 3) Depth - based on the minimum allowable value for safe transportation.

The following categories of cargo are not accepted for carriage (for which in accordance with the Rules for the provision of freight forwarding services, protective shipping containers are required), in relation to which the Forwarder has declared a refusal to package the cargo:

- 1) Sheet glass;
- 2) Car glass;
- 3) Mirrors, double-glazed windows, showcases and their glass components;
- 4) Organic glass and sheet plastic with dimensions of more than 1m².

At the request of the Client, any categories of cargo can be packed in PSC

The forwarder recommends the use of PSC for all types of goods handed over for shipment.
